

CABIN LUGGAGE LIQUIDS

Aside your comfort and great experience, we strive to keep you safe. By complying to the international rules stated below you help us by contributing to the overall pleasant experience of others and yourself.

HOW TO PACK LIQUIDS

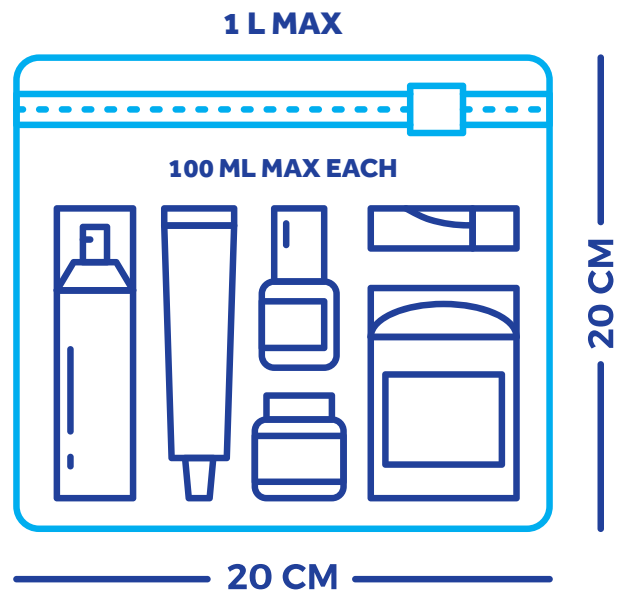

- **100 milliliters or 3.4 ounces each** – take a bit of everything (well, **up to 1L** anyway).
- Any liquid you take with you on your next amazing trip must be kept in individual containers and all of them in a plastic, transparent, re-sealable 20x20 bag.
- To save some time during the security check, please prepare to present the bag with the liquids before scanning.

**NOT
ACCEPTED**

LARGER THAN 100 ML

ACCEPTED

IN A PLASTIC BAG

MILK AND BABY FOOD

Traveling with your baby should always be a joy! Thus, **you are allowed to carry as much baby milk, powdered milk and baby food as you need for your trip, without any limitation.** Also, you don't need to worry about fitting them in the transparent bag!

MEDICINE

Are you required to take liquid medicine with you on your next flight? No problem! Take as much as you need and you don't even have to fit it in a transparent bag, **but you should have it ready for inspection by airport security and you also need the medical prescription.**
